List of changes

Date of change	Description of changes
18.09.2014	Report CLR06C: <ul style="list-style-type: none">An attribute ClientCode has been added to the RECORDS element.
26.04.2025	Reports CLR06, CLR06C: <ul style="list-style-type: none">New Instrument group code «CRCY_F – Foreign currency» added to BoardID and BoardName attributes;New Security category «1 - currency» added to SecurityType attribute;Attribute BaseCurrencyId added to SECURITY element. Report CLR15: <ul style="list-style-type: none">New types of fee «27» and «28» added to FeeType attribute. Report CLR22: <ul style="list-style-type: none">Attributes FineSum, FineRate, DebtsTotal added to DEBTS element;Attribute DebtsType removed from DEBTS element.

Document formats

Information is exchanged between the client and server applications via messages in XML version 1.0. Complete XML Version 1.0 specification is given in Extensible Markup Language (XML) 1.0 (Second Edition), developed by W3C and published online at <http://www.w3.org/TR/REC-xml>.

This chapter contains a brief description of the structure of XML document version 1.0.

Description of the report fields and XSD reporting templates are available at the CC website: <https://itsx.kz/services/reports/>

XML document prelude

XML document prelude describes global parameters of XML document and provides instructions to the processing programme for that document. Prelude can contain several instructions, each starting with the sequence of characters `<?xml` and ending with the sequence characters `?>`. The first line of the prelude is always XML declaration specifying the character encodings used in the document.

Example prelude:

```
<?xml version="1.0" encoding="UTF-8"?>
<?xml-stylesheet type="text/xsl" href="form_individual.xsl"?>
```

where the first line is XML declaration specifying the character set used, the second line is an instruction to the message processing programme.

Restriction: document encoding shall be UTF-8 only.

XML document elements

Each XML document contains one or more elements, whose boundaries are denoted by either a start tag (`<elem>`) - end tag (`</elem>`) or empty element tag (`<elem />`) if the element has no content. Content of an element is the text between the start and end tags. Each element has a specific type that is recognisable by name and called a "generic identifier" of the element. Type of the element in the end tag shall match a type of the element in the start tag. Each element can have a set of attribute specifications. Each attribute specification has a name and value. Attribute name in the start tag or empty element tag can only be used once.

Example non-empty element without attributes:

```
<elem> content </elem>
```

Example empty element with two attributes:

```
<elem attr1="attribute value 1" attr2="attribute value 2" />
```

XML document always contains one root element that includes any number of other elements. Each element can contain any number of other elements. Such documents are called child elements of such element.

Example of a child element:

```
<parent>
<child>child element content</child>
</parent>
```

Attributes of XML document elements

Each element can contain any number of attributes. Attributes are intended to convey additional information about the element. Attributes can only be placed in the start and empty element tags immediately after the element name as attribute-value pairs. Attribute values cannot contain left angle bracket (<), right angle bracket (>), ampersand (&), apostrophe (') or double quote ("). These characters are encoded with "<", ">", "&", "'", """ respectively.

Example empty element with an attribute:

```
<elem attr="attribute value" />
```

Codes

In column **M/O** of tables describing application and service elements, **M** symbol means that the corresponding attribute or sub-element is mandatory, and the symbol **O** means that it is optional. If any element is not specified, its attributes are also not specified, even if marked as mandatory. **Rev** column indicates a specification version number of the report in which this element/attribute is implemented.

Data types

Type	Description
Integer	Integer value
Boolean	Logical value (True or False)
Numeric(M,N)	Real value with a fix point. Zeros after the decimal point can be discarded
Char	One character (Cyrillic characters are not allowed)
String(M-N)	String value (Cyrillic characters are not allowed) M is minimum allowed number of characters. If not specified, then a fixed-length field N is the maximum allowed number of characters
WString(M-N)	String value, including Cyrillic characters M is minimum allowed number of characters. If not specified, then a fixed-length field N is the maximum allowed number of characters
Date	Date. String format: YYYY-MM-DD
Time	Time. String format: hh:mm:ss
DateTime	Date and time. String format: YYYY-MM-DD hh:mm:ss.cc
Y_N_type	Enumerated type, Values Y (yes) and N (no)

XML documents in the Electronic Document Management System

For XML messages in the Electronic Document Management System a root element is **RTS_DOC**

Each message in the Electronic Document Management System (including CC reports) has the following structure

Element name	Attribute name	Description	M/O	Type
RTS_DOC		Root element of the XML document	M	
DOC_REQUISITES		Document Information Section	M	

	DOC_DATE	Document date	M	Date
	DOC_TIME	Document time	M	Time
	DOC_NO	Unique document tracking number in the EDMS	M	String(0-20)
	DOC_TYPE_ID	Document type identifier in the EDMS	M	String(0-20)
	SENDER_ID	Sender code in the EDMS	M	String(3-7)
	SENDER_NAME	Short name of the sender	O	WString(0-512)
	RECEIVER_ID	Recipient's code in the EDMS	M	String(3-7)
	REMARKS	Notes to the document	O	WString(0-120)
	/DOC_REQUISITES		O	
< Document type identifier in the Electronic Document Management System />		Child element containing business data of the document	M	Element
/RTS_DOC		Root element	M	

Specification of report formats

CLR06 Report on Obligations Accepted for Clearing (Extract from the Register of Agreements Accepted for Clearing)

Report on the Clearing Member

Generated based on the results of clearing

Generated in the additional mailing list using intermediate data available at the time of generation.

StampDuty may not be reported on the day the Agreement is entered into.

Element name	Attribute name	Description	M/O	Type

	SecShortName	Short name of the supplied asset (instrument)	M	WString(0-256)
	FaceValue	Security Face Value	O	String(0-28,8)

	SecCurrencyId	Security face value currency	O	String(0-12)
	PriceCurrencyId	Price (quotation) currency	M	String(0-12)
	SecurityType	Security category: 1 - currency 101 — Ordinary shares or REIT 102 — Preferred shares 105 — ETF 107 - ADR 108 – GDR 110 - Mortgage Note 201 — Government Bonds 202 — Municipal Bonds 204 — Corporate Bonds 205 – Bonds of a Credit Institution 206 – Exchange Bonds	O	Integer
	PriceType	Price type: PERC - percentage of face value CASH – in the price currency	M	String(0-4)
	BaseCurrencyId	Base currency (for currency instruments)	O	String(0-3)
RECORDS		Section of data on the agreement	M	
	RecNo	Serial number	M	Integer
	TradeNo	Document No.	M	Integer
	TradeNoExtra	Additional agreement number	O	Integer
	TradeDate	Date of Agreement Conclusion	M	Date
	TradeTime	Time of agreement registration in the Trading System/System, time of acceptance of orders for clearing of OTC contracts (Astana)	M	Time
	PrimaryOrderID	OTC Order/Offer number	O	Integer
	OrderID	Additional system identifier/trading systems	O	Integer
	Comment	Comments	O	WString(0-64)
	TradePlace	Code of the Trading Platform that registered the agreement Possible values <ul style="list-style-type: none"> • 2000 – International Trading System Limited 	O	Integer
	TradePlaceName	Name of the Trading Platform that registered the agreement. Possible values <ul style="list-style-type: none"> • International Trading System Limited 	O	WString(0-256)
	BuySell	OTC Order/Offer (focus) (buy (B) / sell (S))	M	Char
	SettleCode	Code of settlements under the agreement	O	String(0-16)
	TradePeriod	Period of exchange agreements execution: 1 – Main trading session 2 – Additional trading session 3 — Additional morning trading session. Not specified for OTC Contracts	O	Integer

	TradeType	Agreement type: T – by untargeted order; N – by targeted order; D – without order; O – OTC contract executed on the basis of Type 1 OTC Offer P – OTC contract executed on the basis of Type 2 OTC Offer	O	Char
	TradeModeld	Trading mode/OTC contract ID 1. - Main trading mode 2. - Negotiated transaction mode 3. - Targeted Repurchase trading mode 10. - RFQ trading mode 12. - Anonymous Repurchase trading mode 13. - Execution of OTC Contracts with transfer to clearing 14. – Execution of OTC Contracts/OTC Repurchase Agreements.	M	Integer
	TradeInstrumentType	Type of instrument 1 — futures instruments 2 — options 3 – Qualified Investments with partial coverage 4 — repurchase 5 — related purchase and sale transactions 9 - Qualified Investments with full coverage	M	Integer
	Decimals	Number of valued decimal places in prices. For repurchase transactions, this indicator shows the accuracy of the repurchase rate. The number of digits in the price of the first and second parts of the repurchase is 8 digits.	O	Integer
	Price	Price per instrument	M	Numeric(28,8)
	Quantity	Agreement scope, in lots/instruments	M	Numeric(28,8)
	Value	Agreement scope, in price currency	M	Numeric(28,8)
	Amount	Cash obligation, in the settlement currency. For Internal OTC Contract/Internal OTC Repurchase Agreement, the amount of cash in the settlement currency at the end of clearing to be recorded by the Clearing Member as the obligation under the agreement settlements under which will be made at the end of clearing	M	Numeric(28,8)
	Balance	Securities obligation	M	Numeric(28,8)
	CorpEvent	Corporate event holding: S – splitting RS – consolidation D – dividend payment SO – spin-off N – coupon payment M – mergers and acquisitions	O	Char
	ExchComm	Trade arrangement commission fee in the currency of settlement Trade fee in the currency of settlement	O	Numeric(28,8)

		(to be completed only for agreements entered into on the date of report)		
	ClrComm	Clearing commission in the settlement currency	O	Numeric(28,8)
	LicComm	Licence remuneration in the settlement currency	O	Numeric(28,8)
	ClrAccCode	TCA Code	M	String(0-12)
	ClientDetails	Client's identification data	O	WString(0-256)
	CCPCode	Central Counterparty ID If no attribute is specified, then an agreement is executed without a Central Counterparty. Possible values ITSCP - International Trading System Limited	O	String(0-16)
	CPFirmId	Counterparty Identifier (for targeted agreements only)	O	String(0-16)
	CPFirmShortName	Abbreviated name of the counterparty (for targeted agreements only)	O	WString(0-32)
	ClientCode	Client short code or short code of the customer of the Clearing Member's Client	O	WString(0-12)
	DueDate	Settlement Date	M	Date
	Acclnt	Accumulated coupon income calculated with regard to the quantity of assets under such agreement, in the settlement currency	O	Numeric(28,8)
	Price2	Price of the second REPO part*	O	Numeric(28,8)
	RepoPart	REPO part 1 - first repurchase agreement part 2 - second repurchase agreement part	O	Integer
	RepoPeriod	Repurchase period in calendar days	O	Integer
	RepoRate	REPO rate in %	O	Numeric(28,8)
	Type	Type of agreement entered into for settling a potential default and for performance of obligations under the agreements: 1 — repurchase agreement in case of default by the Clearing Member; 2— sale and purchase agreement in case of default by the Clearing Member; 3 - repurchase agreement in case of default by the CC; 4 - sale and purchase agreement in case of default by the CC; 5 — repurchase agreement executed by the CC to attract assets to settle defaults; 6 - sale and purchase agreement executed by the CC to forcibly close the Clearing Member's position; 7 - sale and purchase agreement executed for fulfilment of obligations (agreement executed for position transfer to another trading platform); 8 - agreement executed to close the position after performance of the supply/settlement futures contract; 9 –agreement executed after performance of an option contract.	O	Integer
	FineDebit	Fine withheld, in the settlement currency	O	Numeric(28,8)
	FineCredit	Fine accrued, in the settlement currency	O	Numeric(28,8)
	StampDuty	Transaction Tax Equivalent (Stamp Duty)	O	Numeric(28,8)
	StampDutyPrice	Closing price used in calculating the Transaction Tax equivalent for the transaction	O	Numeric(28,8)

*Price of the second part of a Securities Repurchase Agreement, other than a Securities Repurchase Agreement concerning a bond, is calculated by the following formula: $Price2 = \text{Rounded}(\text{Rounded}(\text{Price} * \text{Balance} * (1 + \text{RepoRate} * () / 100); 2) / \text{Balance}; \text{Decimals})$, where:

Price - price of the first part of the Repurchase Agreement;

Balance - obligations under the Repurchase Agreement, in pieces;

RepoRate – RepoRate in %;

T365 - number of calendar days between the Settlement Date of the first part of the Repurchase Agreement and Settlement Date of the second part of the Repurchase Agreement within a calendar year of 365 days;

T366 is the number of calendar days between the Settlement Date of the first part of the Repurchase Agreement and Settlement Date of the second part of the Repurchase Agreement within a calendar year of 366 days;

Number of valued decimal places in prices. For repurchase transactions, this indicator shows the accuracy of the repurchase rate. The number of digits in the price of the first and second parts of the repurchase is 8 digits.

Price of the second part of a Repurchase Agreement concerning a bond is calculated by the following formula:

$Price2 = \text{Round}(((\text{BuybackVolume} - \text{ACY} 2 * \text{Balance}) / \text{Balance}) / \text{FaceValue} * 100; \text{Decimals})$, where:

$\text{BuybackVolume} = \text{Round}(\text{Round}((\text{Price} / 100) * \text{FaceValue} * \text{Balance} + \text{ACY} 1 * \text{Balance}) * (1 + \text{RepoRate} * () / 100); 2) / \text{Balance}; \text{Decimals})$

Price is price of the first part of the Repurchase Agreement, in % of face value;

Balance - obligations under the Repurchase Agreement, in pieces; RepoRate - repurchase rate in %;

T365 - number of calendar days between the Settlement Date of the first part of the Repurchase Agreement and Settlement Date of the second part of the Repurchase Agreement within a calendar year of 365 days;

T366 is the number of calendar days between the Settlement Date of the first part of the Repurchase Agreement and Settlement Date of the second part of the Repurchase Agreement within a calendar year of 366 days;

ACY1 – accumulated coupon income on securities at the date of execution of the first part of the Repurchase Agreement;

ACY 2 – accumulated coupon income on securities at the date of execution of the second part of the Repurchase Agreement; FaceValue – face value of the bond;

Number of valued decimal places in prices. For repurchase transactions, this indicator shows the accuracy of the repurchase rate. The number of digits in the price of the first and second parts of the repurchase is 8 digits.

CLR06C Extract from the Register of Agreements Accepted for Clearing (under agreements executed at the expense of and on behalf of clients of the Clearing Member)

Report is generated by the Clearing Member's clients.

Report is generated based on the results of clearing.

Generated in the additional mailing list using intermediate data available at the time of generation.

StampDuty may not be reported on the day the Agreement is entered into.
